Description

AUTOCOP 1000S TRACKPRO has telematics features as well. You get remote system activation or deactivation option and provision for add-on mobile numbers. Also, alerts nominated number in the event of vehicle theft attempt / alarm. You can actually pinpoint the location of the vehicle via SMS and you get a SMS alert if pre-programmed speed limit is exceeded. Trackpro Re-connected alert is available along with Travelled Distance in reports. You get data storage in the absence of GSM/GPRS network (15000 locations). AUTOCOP 1000S TRACKPRO is a device which does not only helps in high security but also supports tracking of your car. It provides basic security with the Tow Away Alert feature. When you have parked your vehicle in an unauthorized place and it gets picked by vehicle and kept with police, you get an alert. For convenience it has provision to customize the programmable features.

The Real Time Web based Vehicle Tracking feature further enhances AUTOCOP 1000S TRACKPRO's usability. You can easily view vehicle trip history and summary. Other alerts like Alert of Entry or Exit of Geo Fenced area, Route Deviation Alert and Multiple Destination Arrival Alerts (crossover points) are also provided. You get route information of the last three locations via SMS and most importantly can locate nearest fuel pump via SMS.
